

# AGOPRENE®

## Clean enough to eat

(We strongly advise against eating our foam, but if you decide to go ahead, you'll be just fine.)

# Seaweed foam

## *free from petrochemicals*

Our product, the cornerstone of our business, resides inside the items you sit on – unseen yet impactful. Our commitment? To ensure that you can enjoy your seat with a clear conscience, knowing it contains foam free from any petrochemicals.

Our biofoam can be used in applications beyond furniture. We have already tested it in other applications, including shoes (both as padding and insole). We are confident in our ability to replace materials in applications where a human encounters a hard surface.

 100 % biodegradable and can be buried in soil

 100% free of any petrochemicals and other harmful chemicals

 Up to 80% of our production materials are sourced locally

 Over 90% of the energy utilized in our process is sourced from renewable sources
