

## **Preservative Information for BioShield Water-based products**

Preservative used in BioShield Clay Paint, Solvent-Free Wall Paint, Aqua Products and Wall Glaze.

The preservatives are Acticides used in rotation to prevent the formation of resistant bacteria in production equipment.

The active ingredients are:

1.2-Benzisothiazol-3(2H)-on

2-Methyl-2H-isathiazol-3-on

These active ingredients are contained in the preservative at 2.5%

The amount of preservative in BioShield Aqua products is between 0.3% and 0.5%.

The amount of preservative in BioShield Clay Paint and Solvent-Free Wall Paint I approx. 0.1 %

Regarding the dosage of the preservative we can claim that we are 80% below the limit allowed in the European Eco Label.

In BioShield Clay Paint as well as in BioShield Solvent-Free Wall Paint we use only one quarter (or 0.0025%) of the amount of Methyl-isotiazolon allowed for cosmetics (max. allowance for cosmetics is 0.01%.)
