

Support our research to create healthier spaces for everyone.

| Friends of Healthy Materials

As a manufacturer, design firm, organization, or individual, we invite you to join “Friends of Healthy Materials” to support student researchers and the development of transformative resources that accelerate healthy sustainable design.

As a Friend, you will have **access to leading research** in healthy building materials and the opportunity to connect with our researchers. Friends **receive recognition on our website, at public events, and in HML mailings**, which reach tens of thousands of designers and architects.

Members of the Friends circle are invited to donate in a range of \$1000-10,000, typically with a three year commitment. All donations are tax deductible.

For more information contact healthymaterialslab@newschool.edu.

To achieve our goals, Healthy Materials Lab produces a wealth of content and resources. We aim to build on our momentum by:

- | Providing free library of carefully vetted, available healthier materials.
- | Offering online, self-paced courses to wide audiences on platforms including Coursera, YouTube, and The New School.
- | Demonstrating the use of healthier, low-carbon materials made from plants and minerals in affordable housing and subsidized housing.
- | Delivering essential content and knowledge through our website, social, and media appearances.

Thank you to our Supporters

Parsons School of Design, Friends of Healthy Materials, The JPB Foundation, Angelo Donghia Foundation, and other generous organizations and individuals.

Our Impact

Our Material Collections have over 3,000 unique monthly visits.

6,377 graduates from our courses to date.

Over 50,000 downloads of our podcast, Trace Material.

Our audience includes over 25,000 architects and designers interested in Healthy Materials.
